DETAILED ACTION

1. It would be of great assistance to the Office if all incoming papers pertaining to a filed application carried the following items:

1. Application number (checked for accuracy, including series code and serial no.).
2. Group art unit number (copied from most recent Office communication).
3. Filing date.
4. Name of the examiner who prepared the most recent Office action.
5. Title of invention.
6. Confirmation number (See MPEP § 503).

Claim Objections

2. Claim 19 is objected to because of the following informalities: in claim 19, line 7; "said comparator" should be ---said first comparator---. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 15, it seems to imply that the comparator is the same as the comparison means of claim 14. (See fig.3)

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2637

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 8-11 and 14,16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eberhardt (5,930,288).

Eberhardt discloses a communication device comprising a rake receiver having a plurality of fingers, the plurality of fingers adapted to receive multipath signals; and a lock detector coupled to the rake receiver. Eberhardt differs from the present claimed invention in that the filter is not adjusted based on the lock detector rather the filter is selected based on the lock detector. Thus, adjusting the filter based on the lock detector would have been an obvious design choice. The filter of Eberhardt is IIF filter. (See col. 8, lines 66-67)

Allowable Subject Matter

7. Claims 1-7,19-22 are allowed.
8. Claims 15,17-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

9. Applicant's arguments with respect to claims 8-11 and 14 have been considered but are moot in view of the new ground(s) of rejection.
10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Temesghen Ghebretinsae whose telephone number is
